

OTC Alert is a mass notification system that is designed to notify you of any emergency on campus via text message on your cell phone and/or an email message. The types of messages you may receive would include intruder alerts, severe weather warnings, school closings, etc. The system will not be used for non-emergent type messages and is an 'opt-in' system, meaning you decide whether to participate. The only cost associated with the system is the cost of the text message from your cellular carrier. If you would like to enroll in OTC Alert, you must set up your personal account.

How to sign-up for OTC Alert

1. Go to BANNER Web (link available under Current Students tab of OTC website)
2. Click "Enter OTC Banner Web"
3. Enter "User ID" This can be either your Student ID number or your social security number entered without dashes
4. Enter "PIN" Your initial PIN is your date of birth (MMDDYY). If you have previously logged in, your PIN will be whatever you changed it to
5. Click "Login" button
6. Click "Personal Information" menu link
7. Click 'OTC Alert Sign-up'
8. This will take you to the OTC Alert page. On this page, you will find pertinent information, as well as the subscription link for sign-up and log-on when you make changes to your account, such as changing phone numbers or e-mail addresses. Follow the simple directions to sign-up & you are ready to go.

We are excited to have this latest innovation to be used in providing for a safe & informed population on campus. Whether on main campus or one of the Workforce Development Centers in Evans, Screven, or Bulloch, you can stay informed of any emergent event on campus.
